

# **CivitINFRA**

Enabling smarter management  
for public works organisation

## ▶ Enabling smarter management for public works organisation

From buildings to roads to infrastructure, CivitInfra makes every aspect of infra projects management more system and technology driven

CivitInfra- Public Works Information Management System, is a web and mobile app based enterprise software application for managing all core functional processes of a construction project across its project life cycle, including budgets, estimations, financial & technical approvals, e-tendering, project management, contract management, project monitoring & billing.

## ▶ Overview and key features

- ▶ **Process Integration** - Combining all the processes from budgeting to approvals to cost estimation to contractor & project management, CivitInfra allows integration with generic processes like accounting, staff management and asset management. This enables administration to track & monitor infra projects on real time basis.
- ▶ **Acceleration** - CivitInfra accelerates the cumbersome processes, resulting into saving of precious man-hours and shortening the project lifecycle.
- ▶ **Uniformity & Compliance** - Multiple projects can be managed online through a uniform and consistent system for standardization and quality adherence. The staff can use mobile app to access MIS reports and obtain approvals on the go.
- ▶ **Accountability** - Organizational hierarchy is mapped with process flow, providing MIS reports; which could be used to measure efficiency & take corrective measures.

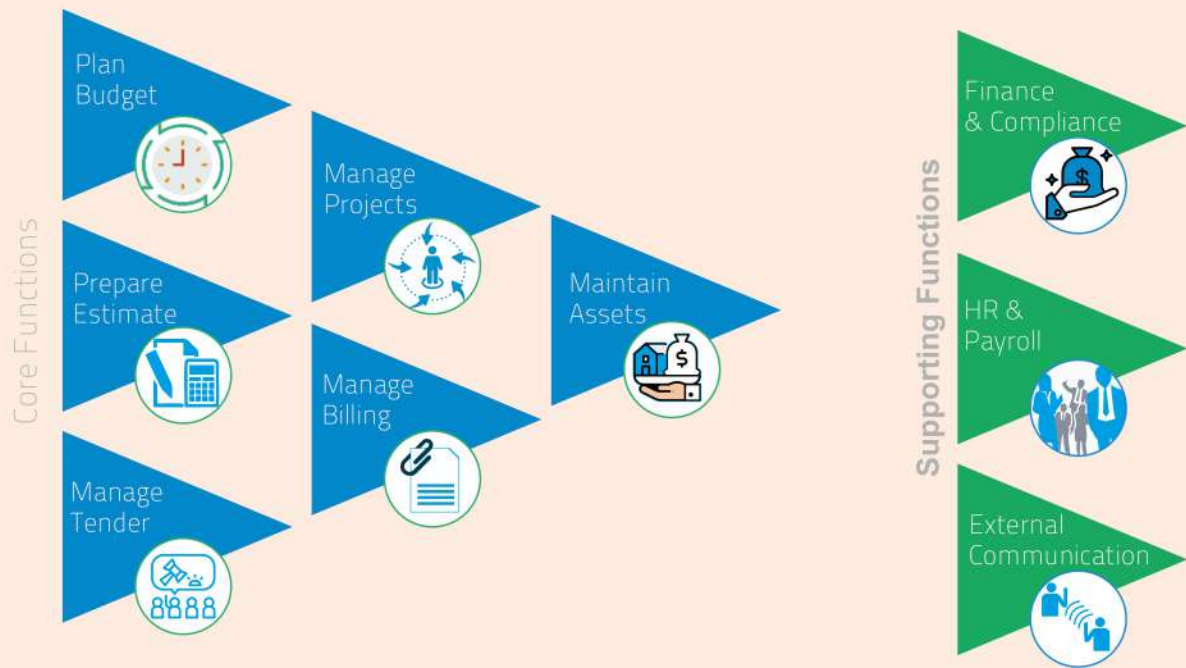

## ▶ Who is it for

- ▶ Department of public works
- ▶ County/city municipal administration
- ▶ General services administration
- ▶ Water & sewer authorities
- ▶ Government organizations managing urban infrastructure & rural development

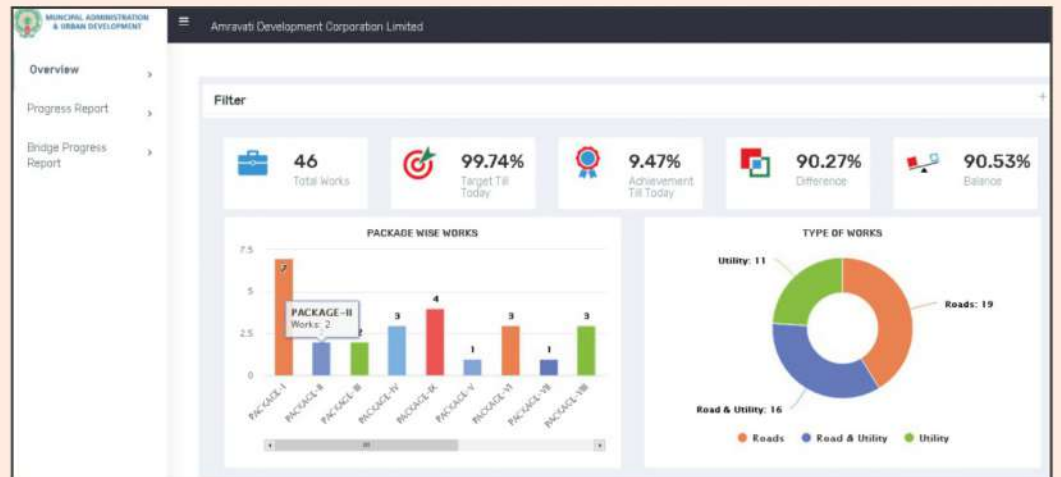

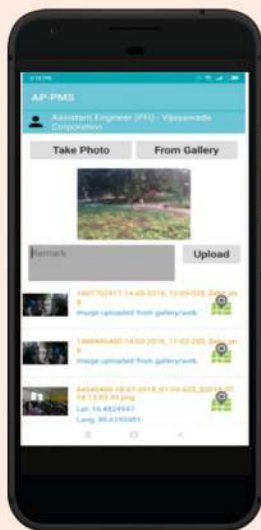

CivitInfra helps organizations to manage the entire lifecycle of multiple infra projects with ease, control costs & resources and ensure timely completion of projects.

---

## ► Process Flow

## ► Mobile App, MIS Reports & Dashboards

Mobile app can be used by staff working on project sites to upload the progress reports along with geo-tagged photos and videos as well as to submit requisitions to head office.

MIS reports and dashboard facilitate understanding of project status on real time basis for business intelligence and to take relevant management decisions.

## Benefits & Advantages

Integrates all functional areas of works management, bringing uniformity & standardization.

Maps the business rules and workflows to staff roles and processes.

Integrated with GIS to provide location mapping for infra projects.

Easier tracking of physical progress of works versus planned activities.

Timely alerts in case of cost and time overruns, enabling preventive as well as corrective measures.

Provides strategic insight and operational intelligence for top management.
