

CGI Advantage Building Permitting

Powered by Civit

Code compliant construction and renovation is important for citizen safety and overall wellbeing. However, traditional building permitting processes often face prolonged approval timelines, challenges with evolving regulations, and inconsistencies due to manual intervention. CGI Advantage Building Permitting overcomes these pitfalls with a modern approach to building permits.

Tailored for architects, builders, and regulatory authorities, this solution seamlessly blends CAD* designs with dynamic, automated code validations for a fast, accurate, and transparent permit issuance process. In the ever-evolving realm of building and construction, CGI Advantage Building Permitting offers a flexible, intuitive solution for state and local governments.

Accelerate building permitting operations

Embrace a seamless, AI-driven experience that makes design validation against building codes swift, precise, and efficient. Integrated natively into CGI Advantage ERP, this solution redefines what is possible in building permit management.

- Automated compliance and validation – Accelerate your design validation with a robust rules engine and gain instant visibility into building plan code compliance.
- Citizen-friendly interface – Navigate submissions, validations, and approvals with a sleek, intuitive dashboard designed for ease and efficiency.

CGI Advantage Building Permitting at a glance:

- Automate compliance and reduce approval times with an advanced rules engine.
- Eliminate manual validation and achieve standardization for consistent building code applications.
- Expedite the permitting validation and approval process.
- Leverage a solution updated with the latest building codes to ensure compliance.
- Eliminate paper-based processes.
- Discover unparalleled transparency to all stakeholders with real time updates.
- Enhance collaboration through a centralized hub for all stakeholders.
- Experience a unified solution through the CGI Advantage platform.

* 2-D CAD drawings or 3-D BIM models.

- Historical data review – Empower your design decisions through access to past submissions and comprehensive data analytics, supporting continuous improvement and compliance.

Partner for better compliance

With CGI Advantage Building Permitting, every stakeholder becomes an integral part of the compliance narrative. Empowered with state-of-the-art tools that provide instantaneous feedback, stakeholders ensure their visionary designs seamlessly align with regulatory requirements.

- Public and department portals – Provide access to architects, builders, and citizens through a transparent portal. Consistent automation, transparency, access to information, and proactive notifications across each step of the permitting process increases trust and engagement.
- Automated verification – Avoid delays due to manual intervention, evolving building codes and regulations, and iterative corrections with powerful automation.
- Community commitment – Leverage CGI Advantage Building Permitting to support safe, compliant, and sustainable practices. Work towards organizational goals while bolstering community trust.

Embrace the future of building permits

CGI Advantage Building Permitting simplifies and accelerates complex processes while proactively maintaining compliance. Leverage a solution that understands the unique needs of state and local governments and ensure that every structure built is a symbol of safety, excellence, and community trust.
